

Table of contents

Introduction	p 4
About the series	p 5
Curriculum matrix	p 6

Media Arts Music	Rhythm Loop	p 8
-----------------------------------	--------------------	-----

Kitchens can be noisy places, but they can also have satisfying rhythms. We explore music-making by sampling sounds in the kitchen and garden, to create performance art of a kinetic kind!

Health and Physical Education Science Geography Languages	The Science of Taste	p 15
--	-----------------------------	------

Sweet, sour, salty and bitter – we explore these tastes as well as the elusive fifth taste, umami. Flavours are created as our bodies respond to certain chemicals in foods, but they change depending on our age and physiology, the temperature of foods, and our cultural expectations. This science unit leads to explorations of cuisine, language and culture.

Science Design and Technologies History Geography Mathematics	Farms and Market Gardens – Past and Present	p 28
--	--	------

This unit was created in collaboration with the National Museum of Australia. We explore how the size of farms has changed in Australia, and how this relates to changes in technology, sources of energy and sustainability. We compare farms in the past to farms of today, and look to the future in terms of urban agriculture and food security.

Health and Physical Education English Economics and Business	Food in the Media	p 51
---	--------------------------	------

Our students are bombarded by food advertising and it is important that they learn to be media-savvy. In this unit we unpack the use of persuasive words and images in food advertising, debunk junk food 'beauty' techniques, photograph our own healthy kitchen dishes, search out unquantifiable claims and produce video and still advertisements of our own.

English	Careers in the Food Industry	p 65
----------------	-------------------------------------	------

Many students who have experienced and enjoyed the Kitchen Garden Program want to be chefs. This unit provides an insight into the broad range of career opportunities in the food industry, from farming to software development, event planning, haute cuisine, restaurant management and much more.
